Your Brand. Your Parking Lot. Your Message.

Our posts flex in more than one way.

How do you continue to differentiate yourself when the customer experience is now often limited to the parking lot? You've gone through great lengths to brand your store via interior design, website, app, and exterior building signage. FlexPost® can help you take your brand to the parking lot while keeping people safe - with signpost solutions that are customizable, quick to install and save money on parking lot repairs.

Our configurator tool makes it easy to visualize how your FlexPost-XL™ or FlexBollard-XL™ could look in your parking lot. Below are a few idea starters. Try it out [here](#). Choose from pre-selected bollard/post heights, colors, and sign designs. Or, upload your own custom sign images to start your own "parking lot" of possibilities!
