# Your Brand. Your Parking Lot. Your Message.

**Our posts flex in more than one way.**

How do you differentiate your organization when the customer experience now often begins in the parking lot?

You've gone through great lengths to brand your facility via interior design, website, app and exterior building signage.

However, the first experience a customer may have with your brand is within the confines of a parking space.

FlexPost® can help you take your brand to the parking lot while keeping people safe - with signpost solutions that are customizable, quick to install and save money on parking lot repairs.

Our configurator tool makes it easy to visualize how your FlexPost-XL™ or FlexBollard-XL™ could look in your parking lot.

Choose from pre-selected bollard/post heights, colors and sign designs. Or, upload your own custom sign images to start your own "parking lot" of possibilities!
