XPT ECO PARKING BLOCK

BLACK & YELLOW

Tough, Eco-Friendly & Built To Last

pittman[®]

OVERVIEW

The XPT Eco Parking Block is the perfect solution for sustainable and reliable parking management. Made from a durable blend of plastic and rubber, this block is designed to withstand daily use while retaining its strength and shape over time.

Crafted from REACH-certified recycled materials, it's an eco-friendly option that helps reduce environmental impact. The block's heavy-duty construction features thick walls and V-shaped reinforcement ribs, providing the strength needed to support vehicles of all sizes. High-visibility reflective tape ensures the block is easily seen in low-light conditions, enhancing safety for drivers and pedestrians.

Ideal for public parking lots, private garages, or commercial facilities, the XPT Eco Parking Block delivers long-lasting protection for vehicles, buildings, and people.

PRODUCT FEATURES

- Eco-Friendly Materials - Crafted from REACH-certified recycled materials to reduce environmental impact.
- High-Visibility Reflective Tape - Ensures the block is easily seen, enhancing safety in low-light conditions.
- Heavy-Duty Construction - Designed with thick walls and reinforcement ribs to support vehicles of all sizes.

TECHNICAL DATA

SPECIFICATION	DETAILS
Material	Plastic-Rubber Composite
Color	Black & Yellow
Width	73 in
Height	4 in
Depth	6 in
Weight	30 lbs
Hardware Included	Coach screw: M12 x 6 in Anchor: Ø 0.67 inch x 4.1 in Cap: Ø 1.32 in
Use Cases	Ensures vehicle alignment and safety in parking lots, garages, and commercial facilities.

HOW IT WORKS

- 1. Position the Parking Block :** Start by measuring 35 inches from the top of the parking space. This is the recommended distance from any nearby objects where the parking block should be installed.
- 2. Mark the Holes:** Place the parking block firmly on the ground in the desired position. Use it as a guide to mark the locations for the hardware holes.
- 3. Drill the Holes:** Move the parking block aside and drill holes where you marked.
- 4. Install the Wheel Stop:** Line up the parking block with the drilled holes. Then, bolt it securely into place.
- 5. Ready for Use:** Once installed, the parking block is ready for immediate use.
