# GHP EXPANDABLE MOBILE BARRICADE

Expandable Safety Barrier: Durable, Visible, Compact

**pittman**<sup>®</sup>

## OVERVIEW

The GHP Expandable Mobile Barricade is the ideal solution for quickly securing hazardous areas. It expands up to 13' and folds down to a compact size, making it easy to store and transport.

Made from durable plastic, this barrier is built to withstand heavy use. Its built-in caster wheels and brakes make it quick and easy to deploy, while the clip-in straps keep it securely closed during transport. The barrier's adaptable design allows for straight or angled configurations to suit various spaces and needs. Each panel includes a clear caution symbol for enhanced visibility and safety.

The GHP Mobile Barricade is ideal for use in warehouses, factories, malls, and schools.

## PRODUCT FEATURES

- Expandable Design - Extends up to 13 feet and folds compactly for easy storage and transport.
- Durable Plastic Construction - Withstands heavy use in demanding environments.
- Caster Wheels with Brakes - Enables quick deployment and secure placement in any space.
- Enhanced Safety Features - Clear caution symbols and clip-in straps ensure visibility and stability during use.

## TECHNICAL DATA

SPECIFICATION	DETAILS
Material	Plastic
Color	Yellow & Black
Height	40 in
Expanded Width	152 in
Closed Width	23 in
Depth	14.5 in
Weight	44 lbs
Applications	Perfect for quickly securing hazardous areas and controlling access in warehouses, malls, and public spaces.

**EASY ROLL WHEELS**  
Quick and easy movement with the built in castors

**BUILT-IN STRAPS**  
Prevents the barrier from opening during transport

## HOW IT WORKS

- 1. To Open:** Release the straps holding the barrier closed and pull until it is extended to the desired width.
- 2. Position the Barrier:** With hazard markers on both sides, the barrier can be positioned in any direction. Form a straight or curved line, depending on the area you're covering.
- 3. Close When Finished:** Use the handy straps to secure the barrier in the closed position when finished with, helping to avoid injury when moving or storing.
